EDUCATION

Fudan University

Shanghai, China

Master of Science in Electronics Science and Technology

Sep. 2022 - Present

- GPA: 3.85/4.00 Rank: 1st (out of 45) Core Courses GPA: 4.00/4.00
- Research Field: Design Automation, Integrated Circuit and System Design
- Major Courses: Advanced Digital Integrated Circuits Design, Parallel Computing, Discrete Mathematics & Optimal Decision, System-Level FPGA Design, Digital Signal Processing VLSI Design

Cornell University Ithaca, USA

Visiting: Graduate Intern in Electrical and Computer Engineering Department

June 2024 - Jan. 2025

- Research Field: Domain Specific Compiler, Programming Language
- Project: Programming Model for Composable Accelerator Design, Tile-based Programming Interface

Fudan University Shanghai, China

Bachelor of Engineering in Microelectronic Science and Engineering

Sep. 2018 - June 2022

- GPA: 3.80/4.00 Rank: 3rd (out of 147) Graduated with Highest Distinction
- Research Field: Hardware Accelerator, Artificial Intelligence Application
- Thesis: A Hardware Acceleration Strategy of Squeeze-and-excite Network Based on the FPAI Chip and Compiler

Research Experience

Research Intern, Computer Systems Laboratory

Cornell University, Ithaca, USA

June 2024 - Present

Advisor: Prof. Zhiru Zhang

Research Assistant, State Key Laboratory of ASIC and System

Fudan University, Shanghai, China Feb. 2022 - Present

Advisor: Prof. Jun Yu, Prof. Kun Wang, Prof. Jianli Chen

Research Intern, Intelligence Computing Lab

Shanghai Fudan Microelectronics Group Co., Ltd, Shanghai, China

July 2021 - Feb. 2023

Advisor: Prof. Jun Yu, Jicheng Lu

Research Assitant, Video and Image Processing Lab

Fudan University, Shanghai, China Aug. 2020 - May 2021

Advisor: Prof. Yibo Fan

Publication

[1] TransLib: An Extensible Graph-Aware Library Framework for Automated Generation of Transformer Operators on FPGA

Yang Liu, Tianchen Wang, Yuxuan Dong, Zexu Zhang, Shun Li, Jun Yu, Kun Wang 43rd ACM/IEEE International Conference on Computer-Aided Design (ICCAD), 2024

[2] Deploying Diffusion Models with Latency-Oriented Scheduling and Memory Overflow Prevention Based on Graph Optimization

Hao Zhou, Yang Liu, Hongji Wang, Enhao Tang, Shun Li, Yifan Zhang, Guohao Dai et al. 30th Asia and South Pacific Design Automation Conference (ASP-DAC), 2025

[3] Fitop-Trans: Maximizing Transformer Pipeline Efficiency through Fixed-Length Token Pruning on FPGA

Kejia Shi*, Manting Zhang*, Keqing Zhao, Xiaoxing Wu, <u>Yang Liu</u>, Jun Yu, Kun Wang 34th International Conference on Field-Programmable Logic and Applications (FPL), 2024

- [4] SDAcc: A Stable Diffusion Accelerator on FPGA via Software-Hardware Co-Design Hao Zhou, Yang Liu, Hongji Wang, Enhao Tang, Shun Li, Yifan Zhang, Kun Wang 32nd IEEE International Symposium On Field-Programmable Custom Computing Machines (FCCM), 2024
- [5] CSTrans-OPU: An FPGA-based Overlay Processor with Full Compilation for Transformer Networks via Sparsity Exploration

Yueyin Bai*, Keqing Zhao*, <u>Yang Liu</u>, Hongji Wang, Hao Zhou, Xiaoxing Wu, Jun Yu, Kun Wang 61st ACM/IEEE Design Automation Conference (DAC), 2024

[6] DIF-LUT: A Simple Yet Scalable Approximation for Non-linear Activation Function on FPGA Yang Liu, Xiaoming He, Jun Yu, Kun Wang

33rd International Conference on Field Programmable Logic and Applications (FPL), 2023

.

(Papers Under Review)

[7] DIF-LUT Pro: An Automated Tool for Simple yet Scalable Approximation of Nonlinear Activation on FPGA

Yang Liu, Shuyang Li, Yu Li, Ruiqi Chen, Shun Li, Jun Yu, Kun Wang IEEE Transactions on Computer-Aided Design of Integrated Circuits and Systems (TCAD)

PROJECTS

Allo | Python, C++, HLS, MLIR; Vitis, Pytest, CI

July 2024 - Present

- Explore the potential of agile design for programmable architecture with advanced programming model
- Develop tile-based programming interface and relevant features for dataflow architecture

TransLib | Python, Verilog HDL, C++, Shell; PyTorch, ONNX, Docker, Vivado

June 2023 - May 2024

- Proposed an automated and extensible framework for the accelerator generation of transformer networks
- Proposed an innovative graph analysis and matching algorithms, ideal for large-scale networks
- Designed a configurable template library of various operations to explore the design space

<u>DIF-LUT</u> | Python, Verilog HDL, Shell; Vivado

Feb. 2023 - Sep. 2024

- Proposes a simple yet scalable and effective approximation for Non-linear function
- Designed an automation toolchain for table generation and precision evaluation
- Integrated as an computing unit in FPGA-based accelerator for DNN and Nerf

SEResnet Accelerator on SOC | Verilog HDL, C++, Python, Shell; Vivado, VStudio

Feb. 2022 - Dec. 2022

- Organized the acceleration flow of hardware and software co-design with the compiler
- Deployed specific operations on programmable logic resource of SOC
- Programmed and registered C++ operations on host CPU for simulation

The Straggler - A Vertically Scrolling Shooting Game | C++; VStudio

Feb. 2021 - June 2021

- Pay homage to the classic shooting game Raiden, based on a C++ pixel engine
- Developed various game mechanics including skill upgrades, level progression, and boss battles
- Incorporated numerous game features, including pause-and-save, background music, and sound effects

Competitions

2024 CAD Contest at ICCAD

May 2024 - Sep. 2024

- Outcomes: Honorable Mention Team, Participation Mode: Team
- Contest Problem: Power and Timing Optimization Using Multibit Flip-Flop
- Implemented a comprehensive cost model for metrics such as area and delay
- Developed a visualization interface for layout placement results

2021AIWIN Fall – ECG Diagnosis Track

Oct. 2021 - Feb. 2022

- Outcomes: Fifth Place, Participation Mode: Team
- Proposed post-process algorithms for feature correlation analysis
- Implemented mathematical feature extraction as a prior

• Employed existing Python libraries to make further adjustments to the network's prediction

2021 Shanghai Digital Transformation Intelligent Algorithm Competition

Aug. 2021 - Nov. 2021

- Outcomes: Grand Prize, Participation Mode: Team (leader)
- Designed a multi-DNN application scheme for posture recognition in urban scenarios
- Proposed and integrated filter algorithms in the object detection phase
- Collected and transformed appropriate dataset for the urban scenarios

Autonomous Obstacle-Avoidance Mini-Car Competition

July 2021

- Outcomes: Second Place, Participation Mode: Team (leader)
- Completed the control design and physical assembly based on embedded systems
- Programmed control behaviors using assembly language on the 51 microcontroller platform
- Soldered peripheral electrical components to the PCB board

AWARDS AND HONORS

• National Scholarship (Graduate)	Nov. 2024
• Fudan University Outstanding Student (Graduate)	Oct. 2024
• Fudan University Outstanding Administrative Assistant	June~2024
• Fudan University Graduate Student Excellence Scholarship First Prize	Dec. 2023
• Shanghai Outstanding Graduates (Undergraduate)	$June\ 2022$
• Fudan University Undergraduate Student Excellence Scholarship First Prize	May 2022
• Fudan University Outstanding Student (Undergraduate)	Oct. 2021
• Shanghai Municipal Scholarship	Dec. 2020
• Fudan University Outstanding Internet Culture Work: Second Prize	Dec. 2019
	,

Co-founded a student mental health social media page, achieving 2k+ followers and nearly 30k views in one semester

ACADEMIC AND EDUCATIONAL ENGAGEMENT

61st ACM/IEEE Design Automation Conference (DAC)

Moscone West, San Francisco, USA

June 2024

Oral TrafficHD: Efficient Hyperdimensional Computing for Real-Time Network Traffic Analytics

33rd International Conference on Field Programmable Logic and Applications (FPL)

Chalmers University of Technology, Gothenburg, Sweden

Sep. 2023

Poster DIF-LUT: A Simple Yet Scalable Approximation for Non-linear Activation Function on FPGA

Teaching Assistant: Methodology of Integrated Circuit Design

Fudan University, Shanghai, China

Spring 2023

Teaching Assistant: Psychological Training of Success Qualities

Fudan University, Shanghai, China

Fall 2019

Other Work Experience

Administrative Assistant, Mental Health Center of Fudan University

Fudan University, Shanghai, China

Feb. 2024 - June 2024

Middle Manager, Work-Study Program Entity of Fudan University

Student Book Kiosk, Fudan University, Shanghai, China

Jan. 2020 - Jan. 2021

TECHNICAL SKILLS

Languages: Python, C/C++, Verilog HDL, HLS, Shell, Assembly, Tcl, etc.

Developer Tools: Vivado, Vitis, Quartus, Docker, Visual Studio, PyCharm, VMWare Workstation, IATEX, etc.

Frameworks & Libraries: PyTorch, OpenCV, Pytest, NetworkX, Matplotlib, etc.
